Reasons for Allowance

3. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a non-obvious improvement over the invention described in U.S. Patent No. 6,477,572 to Elderton et al., the improvement comprising a system and method for user-selected design and modeling of communication networks, wherein configuration data for different types of communication networks is associated with components, connections, and connection rules for connecting the components. This patentable distinction is included in each of the independent claims, nos. 1, 11, 21, 31 and 34. The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <modeling of communication networks> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at page 6, line 2 through page 23, line 2, and Figures 1-6B. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.
